December 2024

2025 NBCCEDP Allowable CPT Codes

CPT Codes

The 2025 NBCCEDP CPT list is attached. There is one new CPT code for 2025: 99459 - Pelvic examination (List separately, in addition to primary procedure). this code is used to provide additional funding that reflects the cost of pelvic examination packs and in-room chaperones. If a provider performs a pelvic exam for cervical cancer screening during an office visit, you may reimburse for this CPT code along with the office visit. This code provides additional fees for the cost of pelvic examination packs and in-room chaperones. This is only allowed when pelvic exam is done in order to do a Pap or HPV test. It would not be appropriate to cover this code for pelvic exams that are not related to cervical cancer screening.

Telehealth Coverage

Telehealth visits are still allowed following the Medicare guidance. There are new telehealth CPT codes, but these are not yet covered through Medicare. The office visit codes remain listed as permanent telehealth codes. The full list of 2025 telehealth codes can be found at [List of Telehealth Services | CMS](#).

Reimbursement Rates

The 2025 Medicare reimbursement rates have not been released. We will notify you once we learn that they are available.

HAPPY HOLIDAYS!
